Company
Referrals

This is the company you asked about. I know nothing about this company. The biggest thing in windows is how well they enforce there warranty, that there product will last, or both.

Your Home Notes :

1. Windows Need replaced do to age.
2. Gutters and downspouts in good condition.
3. Your roof looked good. I saw no missing shingles. You will eventually need a lite pressure wash and sealer to protect the life of the roof . I don't do this work on pitches like yours. All I can suggest is make certain the company you hire can present you with a current certificate of insurance from there insurance company. And ask for some referrals.
4. Small piece of downspout is missing on the downspout near garabage cans that connects with the underground drain. You can find a small piece of downspout drain at Lowes or Home Depot to make it fit into the underground drain.
